

Full Stack Development - Exercise 4

Blog System Pages

Continue building our blog system:

Given the following sketches, create a multiple page web application as follow:

1. Home Page

2. About Me Page

A Web Page

https://myblog.com

Home | About Me | New Post

Login

About me

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Suspendisse non lacus mi. Praesent ornare tristique pretium. Morbi faucibus nulla quis augue gravida egestas. Aliquam vitae sem ex. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos. Nullam a posuere ipsum. Interdum et malesuada fames ac ante ipsum primis in faucibus.

Nulla facilisi. Donec bibendum dignissim tristique. Donec tempor porttitor tortor, et tincidunt orci dictum a. Suspendisse pellentesque ante ut tellus malesuada, eget efficitur mauris hendrerit. Praesent massa arcu, aliquam eget diam sed, porta dictum ex. Curabitur turpis metus, euismod quis magna nec, mollis rhoncus justo. Aenean nunc tellus, egestas ut diam nec, hendrerit varius turpis. Suspendisse vestibulum ex euismod, fermentum odio eu, semper arcu. Vivamus non enim et tortor porta sagittis commodo quis dui. Nunc sagittis ut eros eu gravida. Praesent hendrerit nisi sit amet molestie varius. Vestibulum lobortis vel eros a iaculis. Nam hendrerit purus non est congue, tristique porttitor nisi efficitur. Proin condimentum pulvinar sapien, eu gravida urna accumsan at. Curabitur vehicula arcu et nisi consectetur, sed viverra tellus eleifend. Nullam suscipit nunc dolor, et condimentum arcu suscipit non.

Aliquam rutrum, ex ut tristique dapibus, purus metus rutrum velit, a facilisis ex magna vitae odio. Nullam in efficitur purus. Donec in mi lectus. Morbi ut fermentum enim, ut pellentesque ipsum. Integer iaculis, lectus non facilisis iaculis, lacus turpis aliquet risus, et aliquam nulla nulla vitae ligula. Mauris in viverra ipsum. Ut varius iaculis libero, eu lobortis est aliquam vel. Phasellus finibus dignissim sagittis. Donec auctor ipsum neque, in iaculis ligula tempor in.

Nunc semper a sapien non tempus. Aliquam elementum, mi at auctor mollis, tortor felis dignissim nulla, eu aliquam est nisi ac magna. Pellentesque ligula nunc, vulputate eu sodales eget, viverra eget sapien. Aliquam nec porttitor nisi. Integer venenatis tristique magna a sollicitudin. Donec mollis ac mi laoreet vulputate. Vestibulum eleifend purus ut scelerisque porta.

3. New Post Page

A Web Page

https://myblog.com

Home | About Me | New Post

Login

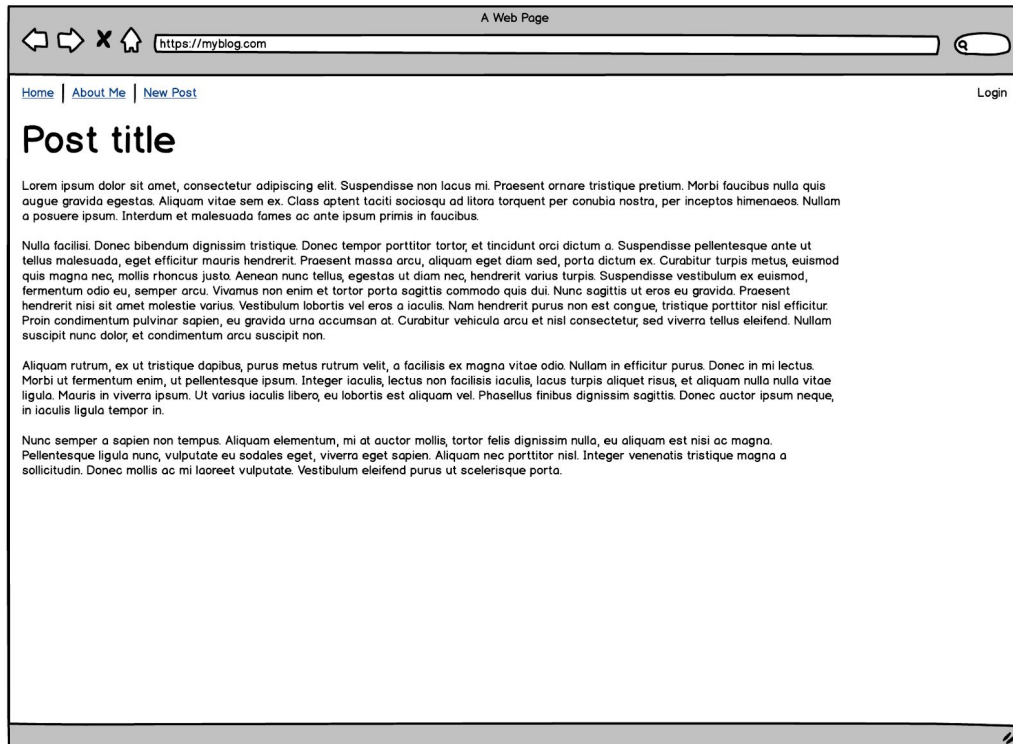

Create new post

Post title goes here...

Post content goes here

Save post

4. Post Page

Submit as a github repository (GitHub page is not mandatory but very good practice)

<https://help.github.com/en/github/working-with-github-pages/getting-started-with-github-pages>

bonus: Newly created post in the New Post Page should be added to the list of posts in the Home Page.

Notes:

1. Use create-react-app with what you did in the last two sessions (JSX Components on multiple files should be your starting point at this stage).
2. No backend needed, create an array of posts objects (title, content, published, author) and work with that
3. The About Me page should be static (plain html/JSX)
4. The Post Page should be dynamic (build from an object in your data structure)
5. Focus on JavaScript rather on CSS (Layout, colours etc.)

6. The links at the top should remain in all pages to allow moving between pages
7. The Home Page SideBar should be static (plain html/JSEX) which means not connected to the data structure at this point
